

Role Agnostic Project Leadership™

Executive capability for leaders who run the organization and change the organization.

RAPL™
EXECUTIVE CERTIFICATION

CHANGE MANAGEMENT

What it is

Leaders start with operational reality, define future state and OKRs, execute through portfolio, programs and initiatives, then return measurable value to operations.

Why now

Disruption, AI, cost pressure and transformation now require leaders who can connect operations, strategy, governance, change and value delivery.

Audience

CEOs, chiefs, directors, senior managers, succession-pipeline leaders, and operations, transformation, and PMO leaders.

Program Snapshot

FORMAT

10 week executive cohort

TIME

30 live hours + applied work

LEARNING

10 modules + capstone

INVESTMENT

\$10,000 USD

Core promise: Move from operational reality to strategic execution and back to measurable operational value.

The RAPL™ Executive Capability Modules

10 MODULES · 1 CAPSTONE

Built for chiefs, directors, senior managers and succession leaders who must run the business through disruption.

01

Operational Reality and Current State Analysis

Assess performance, inefficiency, risk, friction, capacity and value leakage in operations.

02

Business Need, Future State and OKR Definition

Clarify the real need, define future state outcomes and establish measurable OKRs.

03

Strategy Execution Design

Translate leadership strategy into executable work, decisions, capabilities and governance.

04

Portfolio Strategy and Investment Leadership

Prioritize the right work and align people, funding and capacity to strategic goals.

05

Program Benefits Leadership

Coordinate related initiatives so they deliver shared organizational benefits.

06

Project and Initiative Delivery Leadership

Apply delivery discipline to turn approved initiatives into outcomes from any role.

07

Risk, Resilience and Uncertainty Leadership

Protect outcomes by managing disruption, ambiguity, dependencies and exposure.

08

Execution Office and PMO Governance

Create visibility, decision discipline, escalation and accountability for execution.

09

AI Enabled Optimization and AI Initiative Leadership

Use AI to optimize operations and execution, and to deliver AI initiatives responsibly.

10

Operational Transition, Change and Value Sustainment

Hand outcomes back to operations, manage adoption, measure OKRs and sustain value.

Included

- Executive workbook and templates
- Operations to Operations Value Cycle map
- OKR, portfolio, risk, change, AI and PMO tools
- Capstone review and certificate

Program Investment

\$10,000 USD

Flat program fee, per participant

Includes all modules, the capstone review, and certificate.

Why organizations invest

- Reduces wasted initiatives and unclear ownership.
- Improves strategy execution and operational efficiency.
- Builds succession readiness and enterprise thinking.
- Turns projects into adopted, measured and sustained value.
